Q1). Find the text in the first paragraph (stripping out the html), then set the html of the last paragraph to show it is just text (the red bold is gone).

$('p').last().html($('p').first().text());

Q2). Write jQuery code to create a red background for the level-2 list items.

$(''.level-2'').css('backgroud' : 'red');

Q3). Write jQuery code to select the element that comes immediately before item three and change its background color to blue.

$(''.third-item'').prev().css('background' : 'blue');

Q4).

Q5). Write Javascript (jQuery) code to change the color of the parent and grandparent list items of the span of text ("some text") in the following to green.

$("span : contains(''some text'')") .parent().css('background' : 'green'). parent().css('background' : 'green');
